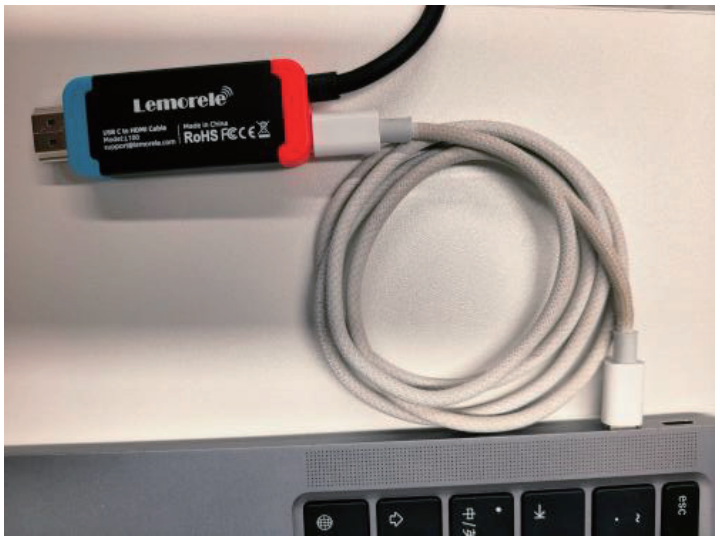
L100 Firmware Update Guide for macOS

Note: When using it for the first time, you'll need to extract the downloaded "L100 firmware update.zip" file to your macOS using an unzip tool. You'll also need a USB-C to USB-C cable that supports data transfer to connect to your Mac.

Firmware update steps

Steps 1

Use a USB-C to USB-C data cable to connect the L100 charging port to the USB-C data port on your Mac.

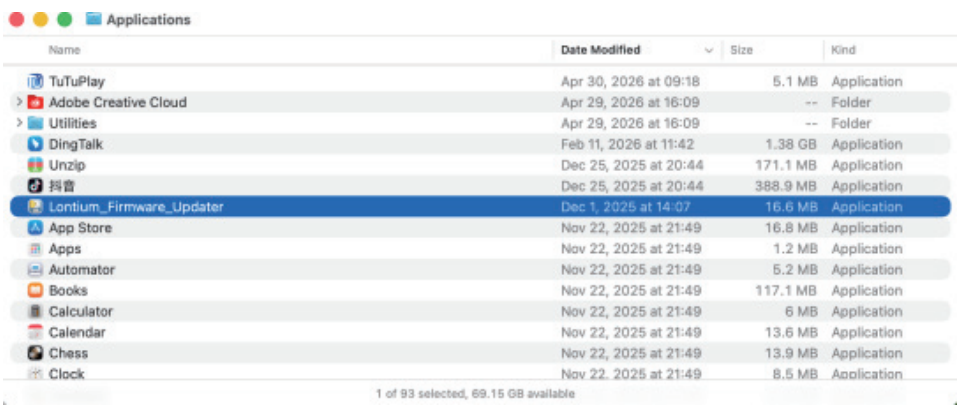


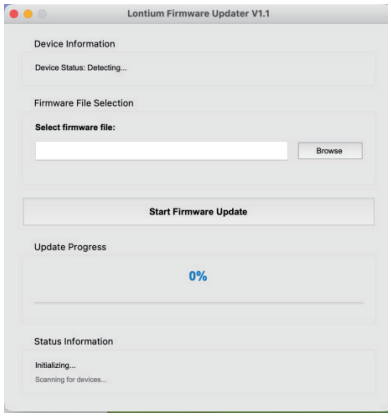
Steps 2

In the extracted tool folder, open the "L100 upgrade tool" folder and launch the "L100 upgrade tool-mac.dmg" application. The installation screen will appear as shown below.

Steps 3

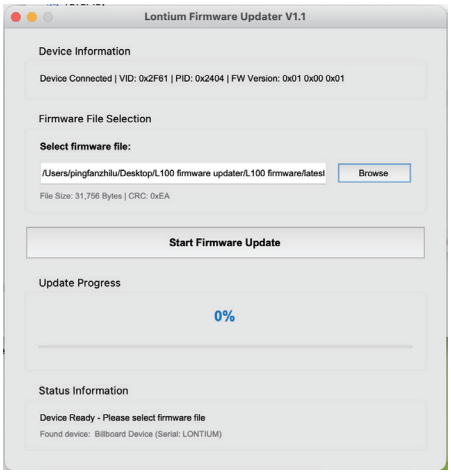
Once the installation is complete, a new folder will appear on your desktop. Open it and launch the "Lontium Firmware Updater" application.

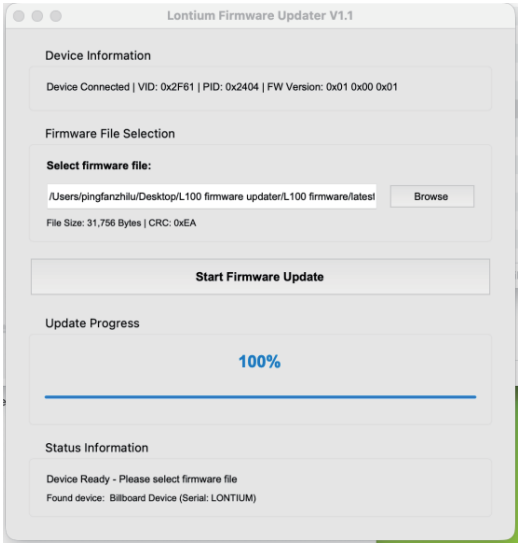




Steps 4

Click "Browse" to locate the extracted folder, then select the "L100-Firmware.hex" file in the L100 Firmware folder. Click "Start Firmware Update" and wait for the upgrade to finish.



Steps 5


When the upgrade tool shows 100% on the progress bar, the firmware update is complete.
